

## Automatic glue spreading machine mod. SG2001

The **SG2001** automatic glue spreading machine is an innovative machine that was developed to speed up the process of glueing strip and border tiles to **paper or mesh**. Besides making the glueing cycle completely automatic, one of the machine's main advantages is that it requires no end-of-cycle cleaning. The **SG2001** glue spreading machine can stand alone on the line, or be used in association with the BB8 rapid dryer. The machine's operative flexibility, user friendly characteristic, low maintenance requirements and mechanical simplicity make the **SG2001** a truly innovative machine.

Max. sheet width	330 mm
Min. sheet thickness	100 gr/m <sup>2</sup>
Max. sheet thickness	300 gr/m <sup>2</sup>
Type of glue	Vinyl
Voltage	380 V
Frequency	Upon
Installed power	0,50 Kw
Installed line power	0,22 Kw
Max. line Height	1000 mm
Max. line lenght	2750 mm
Max. line width	650 mm
